SUMMARY

Result-oriented Computer Science undergraduate specializing in full-stack web development and AI-driven automation. Proficient in designing scalable backend architectures, robust frontend interfaces, and implementing secure authentication pipelines. Adept at leveraging modern frameworks to engineer clean, maintainable, and highly efficient software solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL (PostgreSQL)
- **Frontend Technologies:** React, Next.js, Redux, HTML5/CSS3, Bootstrap
- **Backend Frameworks:** Node.js, Nest.js, Express.js, FAST APIs
- **Databases & Cloud:** MongoDB, PostgreSQL
- **AI & Automation:** Agentic AI, LangGraph, RAG, OpenAI APIs, Scikit-learn, TensorFlow, NumPy, Pandas
- **Developer Tools:** Git, Postman, Docker, JWT, Multi-Provider OAuth 2.0, Stripe

WORK EXPERIENCE

Full Stack Developer - Splenify May 2026 - Present

- **Develop and maintain** multiple production-ready full-stack web applications using Nest.js, PostgreSQL, React, and TypeScript.
- **Design and implement backend services,** REST APIs, database schemas, authentication flows, and business logic using Nest.js and PostgreSQL.
- **Integrate OpenAI,** Stripe, Redis, Docker, JWT, OAuth, BullMQ, and Socket.IO where required

Intern - CitrusBits July 2025 - Aug 2025

- **Architected scalable RESTful APIs** utilizing Nest.js and PostgreSQL to support core backend service features.
- **Engineered predictive data models** using Scikit-learn and TensorFlow, integrating machine learning pipelines with backend endpoints.
- **Optimized database queries** and schema designs in PostgreSQL, improving data retrieval efficiency during development cycles.

EDUCATION

Bachelor of Computer Sciences 2023 - 2026

- Comsats University Islamabad – 3.9 CGPA

PROJECTS

Clinical Appointment System (Nest.js, PostgreSQL, TypeScript, OAuth) | [Code Base](#)

- **Designed a secure backend system** handling clinical scheduling, patient records, and doctor workflows.
- **Integrated Google Calendar API** via OAuth 2.0 to automate real-time appointment syncing and minimize schedule conflicts.
- **Implemented automated email** notification triggers using Node.js backend queues to streamline patient communication.

Car Dealership Platform (React, Node.js, Express.js, MongoDB) | [Go Live](#)

- **Built a full-stack e-commerce marketplace** allowing users to securely list, browse, and purchase vehicles via verified agent tiers.
- **Developed robust user authentication** using JWT and built scalable CRUD operations for dynamic vehicle inventory management.

Resorts Web Application (Node.js, Express.js, MongoDB, JavaScript, Bootstrap) | [Go Live](#)

- **Architected a responsive full-stack listing platform** enabling users to seamlessly browse dynamic resort properties, read detailed reviews, and submit verified user feedback.
- **Integrated third-party APIs** to fetch and render real-time external data, enriching the user experience with accurate localization or pricing details.
